Exo 1

```
function getAngryDog(numberOfWoofs) {  
  let result = '';  
  
  for (let i = 0; i < numberOfWoofs; i++) {  
    result += 'woof';  
  }  
  console.log(result)  
  return result;  
}  
  
var result = getAngryDog(10)  
displayResult(result);
```

Exo 2

```
let housingList = [«Hut», «Flat», «Igloo», «House»];
let result = findHousing(«HoUse», housingList);

function findHousing(housingToFind, housingList) {
  let index = 0;

  let housingToFindLower = housingToFind.toLowerCase();

  while (index < housingList.length) {
    if (housingList[index].toLowerCase() === housingToFindLower) {
      return [index, housingList[index]];
    }
    index++;
  }

  return null;
}
displayResult(result);
```
